

# Bona® Edge

- Access Toe Kicks and Other Hard to Reach Places
- The unique “open-throat” design allows unobstructed air flow in the vacuum chamber
- Cast aluminum body
- “Easy Grip” handles pivot 270 degrees
- DCS® compatible
- Non-marking urethane wheels

The Bona Edge's state-of-the-art design is engineered for performance, convenience and durability, unequaled power, superb balance and superior dust pick-up. Sanding edges and toe kicks is a hard job, but with the Bona Edge you can make the job easier and faster.

With its powerful motor and excellent dust extracting abilities, the Bona Edge is quiet, thanks to the new sound-dampening system. One unique feature of the Edge is the "open-throat" design. The drive belt

is located above the sanding disc in a separate enclosure to create unobstructed air flow in the vacuum. This unimpeded airflow results in exceptional dust pick-up. When operated on the DCS—Dust Containment System—it is virtually dust free, meaning healthier working conditions for you, better finish results, and more satisfaction from your customers

## TECHNICAL SPECIFICATIONS

- **Motor (single phase)** 1.8 HP, 60 Hz, 115 Volt
- **Machine Weight** 32 lbs.
- **Sanding Disc Size** 7"
- **Sanding Disc Speed** 3,800 RPM
- **Combination sanding disc** siafast backed or standard
- **Illumination** 9w fluorescent work light in high impact molded case
- **Vibration Resistant Fluorescent Light**
- **Adjustable Ergonomic Handles**
- **Access Toe Kicks and Other Hard to Reach Places**
