

# Super 10 Belt Sander

The Bona® Super 10 means faster sanding, offering 25% more sanding drum surface than standard 8" machines. The Super 10 is engineered with precision German and American craftsmanship and state-of-the-art technology to provide maximum performance, efficiency and maneuverability.

In addition to the increased drum size, the Super 10 has been designed with an enlarged dust tube and increased fan speed for superior dust pickup.

The precision balanced, American made motor, complete with an on-line volt meter and thermal breaker, is mounted on a German engineered chassis. A spiral-grooved sanding drum with a precision pressure adjustment allows for the most aggressive, chatter-free sanding attainable.

The Super 10 has an easy operating feather handle (see inset photo) to ease the drum up and down to the sanding position. The "dual" rubber rear wheels provide stability for smoother sanding. The emergency stop switch is also removable for operational security when the sander is not in use. Most parts are thumb-screwed for easy breakdown of the machine to add convenience when transporting, especially up stairs.

The dual-chambered "Manifil" bottom-zipped dust bag provides convenience and speed when emptying the bag, while an internal airflow manifold shapes the bag laterally allowing for improved visibility in front of the machine.

The Super 10 sander comes complete with 50 feet of 10/3 yellow non-marking cable, quick release high profile waist belt, "Manifil" dust bag, tool kit, 1-year warranty (5-year windings) and an owner's manual.

## Technical Specifications

Motor (single phase)	5.0 HP, 230 Volt, Thermal Overload Protection
Machine Weight	225 lbs.
Sanding Drum Speed	2,300 RPM
Sanding Drum Width	10"
Abrasive Sleeve Size	9-7/8" x 29-1/2"
Fan Speed	8,650 RPM
Dimensions	37-3/8"L x 17"W x 41-3/4"H
On-Line Digital Volt Meter • 30 Amp 230 Volt Twist Lock Connector
