

Super 8 Belt Sander

The Bona® Super 8 Belt Sander offers the professional flooring contractor a heavy-duty commercial belt sanding machine designed to be user friendly and provide high quality results at an outstanding, affordable price.

The precision-balanced, American made motor, complete with an on-line volt meter and thermal breaker, is mounted on a German engineered chassis. A spiral-grooved sanding drum with a precision pressure adjustment allows for the most aggressive, chatter-free sanding attainable.

The Super 8 has an easy operating feather handle (see inset photo) and lever to ease the drum up and down to the sanding position. Four rubber running wheels provide stability for smoother sanding. The emergency stop switch is also removable for operational security when the sander is not in use. Most parts are thumb-screwed for easy takedown of the machine to add convenience when transporting, especially up stairs.

The dual-chambered “Manifil” bottom-zipped dust bag provides convenience and speed when emptying the bag, while an internal airflow manifold shapes the bag laterally allowing for improved visibility in front of the machine.

The Super 8 comes complete with 50 feet of 10/3 yellow non-marking cable; quick release, high profile waist belt, “Manifil” dust bag, tool kit, 1-year warranty, and an owner’s manual.

Technical Specifications

Motor (single phase) . . .	Continuous 5.0 HP, 230 Volt, Thermal Overload Protection
Machine Weight	210 lbs.
Sanding Drum Speed	2,250 RPM
Sanding Drum Width	8"
Abrasive Belt Size	7-7/8" x 29-1/2"
Fan Speed	7,500 RPM
Dimensions	36"L x 15-1/4"W x 41-3/4"H
On-Line Digital Volt Meter • 30 Amp 230 Volt Twist Lock Connector
